

Medical Waste Management Services

What We Offer - Local Service, Local Company

Bio-Med's unique features and commitment to accessibility and environmentally friendly practices make it a standout medical waste management company. With personalized service and a dedication to professionalism, Bio-Med is an ideal partner for healthcare providers who want to ensure the safe and responsible management of their medical waste.

Environmentally Friendly

From our all-electric service truck, medical waste treatment plant to our reusable medical waste containers, we care about our environment.

Personalized Approach

Large enough to handle any need but small enough where customers can access the owner.

Cost-effective Solutions

We pride ourselves on offering cost-effective solutions for healthcare providers.

Services

We are more than just medical waste providers.

ENVIRONMENTALLY FRIENDLY

Bio-Med is committed to environmentally friendly ways.

PERSONALIZED APPROACH

This personalized approach is rare in the industry and is what sets Bio-Med apart from its competitors.

COST-EFFECTIVE SOLUTIONS

By owning and operating its own processing plant, Bio-MED is able to eliminate the need for a middleman, which can significantly reduce costs for healthcare providers. The processing plant allows Bio-MED to handle medical waste in-house, from pickup to disposal, without the need for third-party vendors or contractors. This results in a streamlined, efficient, and cost-effective process that benefits both Bio-MED and its customers.
